CREATIVE LABS
Learn. Create. Build. Beyond.

GENERATIVE AI

3-MONTH INDUSTRY-SUPPORTED CAREER PROGRAM

Learn to design, build and deploy real-world Generative AI solutions.

DURATION
3 Months / 12 Weeks

LEARNING MODE
Technical Training +
Hands-on Learning + Project Development

LEARN GENAI.
BUILD REAL PROJECTS.
CREATE INTELLIGENT SOLUTIONS.

PROJECT-BASED LEARNING

INDUSTRY-RELEVANT TOOLS

CAREER PREPARATION

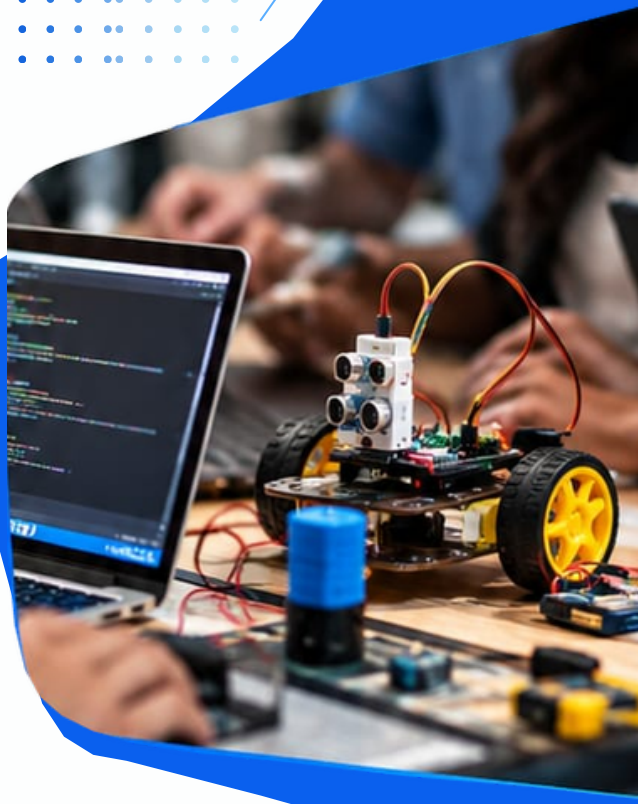

impara CREATIVE LABS
Learn. Create. Build. Beyond.

TECHKNOTS
One knot at a time

A B O U T

IMPARA

POWERED BY TECHKNOTS

Learn. Create. Build. Beyond.

Impara Creative Labs is a student-focused learning and career development platform that helps students turn technical knowledge into practical skills. Through hands-on training, project-based learning, mentorship and industry exposure, Impara helps students learn, build and prepare for real-world technology careers.

POWERED BY TECHKNOTS
Built on the technology, R&D and industry experience of TechKnots.

W H A T W E D O

Industry-Oriented Learning
Practical learning built around relevant skills, tools and technologies used in real-world development.

Hands-On Projects
Learn by building practical projects and applying concepts.

Industry Exposure
Understand real-world workflows, tools and project environments.

Career Preparation
Build technical skills, project experience and professional readiness.

O U R F O C U S A R E A S

- IoT & Smart Automation
- Full Stack Development
- AI & Generative AI
- Data & Emerging Technologies

P O W E R E D B Y T E C H K N O T S

- R&D & Technology
- Industry Experience
- Technology Innovation
- Student Ecosystem

Impara helps students build real-world skills, not just learn theory.

impara
CREATIVE LABS
Learn. Create. Build. Beyond.

12-WEEK GENAI COURSE ROADMAP

A structured learning journey designed to take you from foundations to real-world, project-based Generative AI solutions.

WEEKS 1 – 3

GENAI FUNDAMENTALS

- Introduction to AI and Generative AI
- LLMs, GPT & Transformers
- Tokens and model behaviour
- GenAI concepts and applications
- AI application landscape

01

WEEKS 4 – 6

APPLICATION DEVELOPMENT & RAG

- Python programming for AI
- Data handling and processing
- Building GenAI applications
- Prompting and context handling
- Retrieval-Augmented Generation (RAG)
- Embeddings and vector databases

02

WEEKS 7 – 9

MODELS, MULTIMODAL AI & TOOLING

- Fine-tuning fundamentals
- Transformer architecture and model adaptation
- Multimodal AI (text, image, etc.)
- Image generation workflows
- Model Context Protocol (MCP)
- AI tools and integrations
- Connecting models with external tools

03

WEEKS 10 – 12

AGENTS, AUTOMATION & PROJECT DEVELOPMENT

- AI agents and agent architecture
- Multi-step reasoning workflows
- LangGraph & CrewAI
- AI automation and workflow development
- AI security and reliability
- End-to-end GenAI project development
- Testing, deployment and best practices

04

LEARNING JOURNEY

LEARN
Build a strong foundation in Generative AI and Python.

BUILD
Work hands-on with tools, models and real-world applications.

EXPLORE
Integrate advanced models, multimodal AI and external tools to solve real problems.

DEPLOY
Develop intelligent AI solutions through real projects.

impara
CREATIVE LABS
Learn. Create. Build. Beyond.

TOOLS & TECHNOLOGIES

Work with industry-relevant tools and frameworks used in real-world Generative AI development.

PROGRAMMING & DEVELOPMENT

- Python
- Jupyter Notebook
- VS Code
- Git & GitHub

GENERATIVE AI & LLM FRAMEWORKS

- OpenAI API
- LangChain
- Llama Models
- Hugging Face
- Transformers

AGENTS & WORKFLOW TOOLS

- LangGraph
- CrewAI
- AutoGen
- n8n

RAG & VECTOR DATABASES

- Pinecone
- Chroma
- FAISS
- Weaviate

MULTIMODAL AI TOOLS

- DALL-E
- Stable Diffusion
- CLIP
- Whisper

DEPLOYMENT & CLOUD

- Streamlit
- FastAPI
- Docker
- AWS
- Render

HANDS-ON EXPERIENCE WITH

REAL-WORLD TOOLS

Learn, build and deploy GenAI applications using the same tools and technologies used in industry.

impara
CREATIVE LABS
Learn. Create. Build. Beyond.

SKILLS YOU'LL BUILD

Gain practical, industry-relevant skills to design, develop and deploy real-world Generative AI solutions.

01 GENERATIVE AI FOUNDATIONS

- Introduction to AI and Generative AI
- Large Language Models (LLMs)
- GPT and Transformer fundamentals
- Understanding tokens and model behaviour
- Generative AI concepts and applications
- AI application landscape

02 PYTHON FOR AI

- Python programming fundamentals
- Data handling and processing
- Working with libraries and packages
- Python workflows for Generative AI
- Introduction to agentic workflows

03 GENAI APPLICATION DEVELOPMENT

- Building GenAI applications
- Working with language models
- Prompting and structured interaction
- Context handling
- Introduction to context engineering
- Connecting AI models with applications

04 CONTEXT ENGINEERING, RAG & NLP

- Context engineering concepts
- Natural Language Processing (NLP)
- Text processing and information extraction
- Embeddings and vector-based retrieval
- Working with structured and unstructured information
- Building context-aware AI applications

05 MULTIMODAL AI, MCP & AGENT ENGINEERING

- Multimodal AI concepts
- Text-to-text, text-to-image and image-to-image workflows
- Combining different modalities
- Model Context Protocol (MCP)
- AI tools and tool integration
- AI agents and agent architecture
- Multi-step reasoning workflows
- Agent orchestration (LangGraph, CrewAI)
- Agent-based application development

FROM CONCEPT TO REAL-WORLD SOLUTIONS

LEARN
Build a strong foundation in GenAI.

BUILD
Work hands-on with tools, models and real-world applications.

INTEGRATE
Combine LLMs, RAG, agents and more.

DEPLOY
Develop, test and present.

impara
CREATIVE LABS
Learn. Create. Build. Beyond.

PROJECT-BASED LEARNING

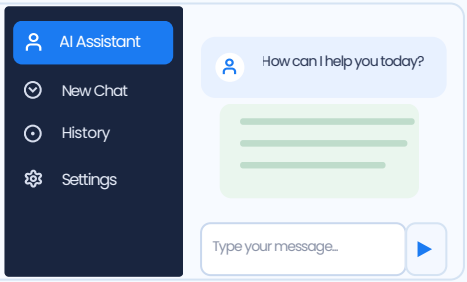

Apply what you learn to build real-world Generative AI solutions through hands-on projects.

2 MINI PROJECTS + 1 CAPSTONE PROJECT

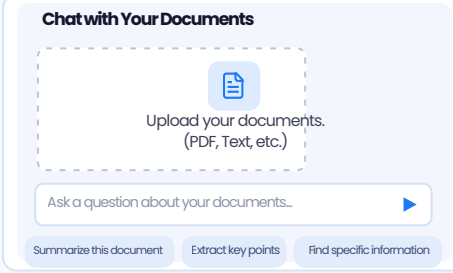

A progressive learning experience to help you apply Generative AI concepts, build real applications and create a complete AI solution.

01 MINI PROJECT 1
WEEKS 3 - 4

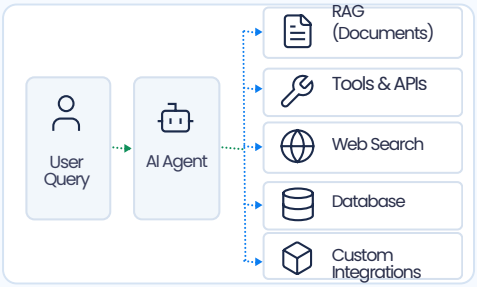

- Build a simple GenAI application using language models
- Implement prompting and structured interaction
- Work with context and user inputs
- Deploy a working application with a user interface

02 MINI PROJECT 2
WEEKS 7 - 8

- Build a RAG-based application
- Work with document processing and embeddings
- Implement information retrieval with LLMs
- Create a context-aware AI system for real-world use

03 CAPSTONE PROJECT
WEEKS 11 - 12

- Build an end-to-end GenAI application
- Integrate LLMs, RAG, agents and automation
- Connect with external tools and data sources
- Solve a real-world problem and deploy a complete solution

WHAT YOU'LL PRACTICE

Prompting & Interaction → Document Processing → Embeddings & Vector Databases → AI Agents & Tool Integration → Automation & Workflows → Deployment & Real-World Applications

3 HANDS-ON PROJECTS

1 COMPLETE GENAI DEVELOPMENT JOURNEY

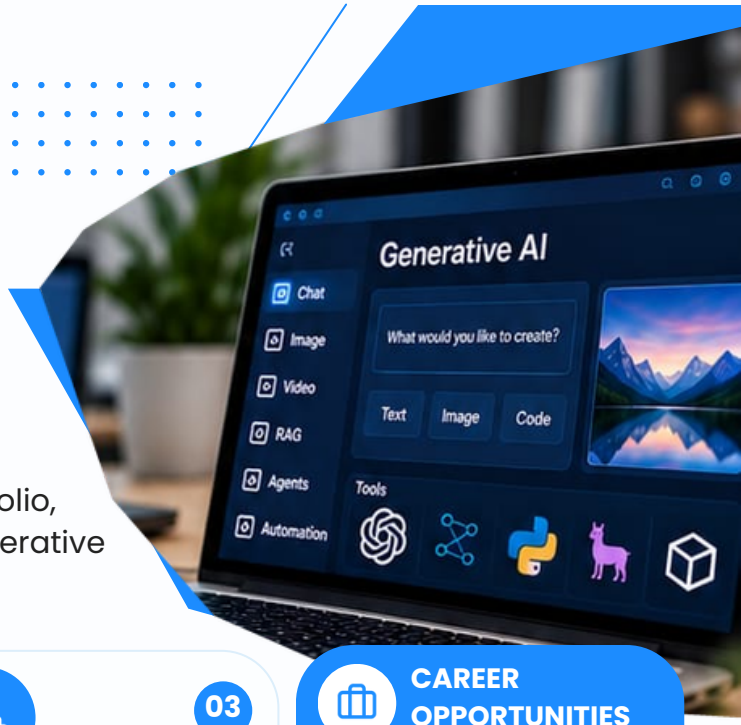

From concept to a working, real-world AI solution.

impara
CREATIVE LABS
Learn. Create. Build. Beyond.

BEYOND THE CLASSROOM

Go beyond technical learning to build a strong portfolio, gain industry exposure and get career-ready in Generative AI.

01

PORTFOLIO-READY PROJECTS

Build 2 mini projects + 1 capstone project to showcase your skills.

02

INDUSTRY EXPOSURE

Learn from industry experts through live sessions, real-world use cases and the latest tools and trends.

03

EXPERT MENTORSHIP

Get guidance from industry professionals throughout your learning journey.

04

CERTIFICATION

Receive a course completion certificate to validate your skills and project experience.

05

LINKEDIN PROFILE SUPPORT

Get help in optimising your LinkedIn profile to showcase your skills, projects and achievements effectively.

06

MOCK INTERVIEWS

Practice with mock interviews to build confidence and prepare for real opportunities.

CAREER OPPORTUNITIES

This program prepares you for exciting opportunities in the Generative AI and related domains.

- AI Engineer
- GenAI Developer
- Prompt Engineer
- Applied AI Researcher
- AI Product Developer
- LLM Solutions Engineer
- Data & AI Analyst
- AI Automation Engineer
- Technical Consultant (GenAI)

YOUR JOURNEY WITH IMPARA

LEARN
Industry-relevant skills with hands-on training

→

BUILD
Work on real-world GenAI projects

→

SHOWCASE
Create a strong portfolio and LinkedIn profile

→

PREPARE
With mock interviews and expert guidance

→

GROW
Be ready for opportunities in Generative AI

SKILLS TODAY. OPPORTUNITIES TOMORROW.

Gain the practical experience, portfolio and confidence to take the next step in your GenAI journey.

impara
CREATIVE LABS
Learn. Create. Build. Beyond.

TAKE THE NEXT STEP IN YOUR GENAI JOURNEY

Learn, build and gain real-world experience with Impara.
Join our 3-Month GENAI Program and develop the skills to create smart, connected solutions.

PROGRAM DURATION
3 Months
(12 Weeks)

MODE
Online / Offline
(As per batch)

NEXT BATCH
September 2026

CERTIFICATION
Course completion certificate from Impara
